

# UI & UX TASK

Tools that would make research journey e backed up with actual  
realtime data

# Data collection Tools

Google forms	Survey Monkey	Zapier
<ul style="list-style-type: none"><li>• Collects survey responses in real-time and automatically updates a Google Sheets document.</li><li>• Use it for surveys, feedback forms, or polls.</li></ul>	<ul style="list-style-type: none"><li>• A powerful survey platform that offers real-time analytics and insights.</li><li>• Useful for large-scale data collection.</li></ul>	<ul style="list-style-type: none"><li>• Automates data collection workflows by connecting different apps (e.g., Google Forms to Airtable).</li><li>• Helps streamline data aggregation from multiple sources.</li></ul>

# Real Time Analytics Tools

## Google Analytics

- Tracks website traffic, user behavior, and demographics in real-time.
- Ideal for understanding online audience trends.

## Tableau Public

- Visualizes data in real-time with interactive dashboards.
- Perfect for presenting complex data in an easy-to-understand format.

## Power Bi

- Microsoft's business analytics service that transforms data into interactive visuals.
- Supports real-time data streaming and integration with multiple data sources.

# Real Time Chat and Feedback Tools

# Real Time Collaboration Tools

## Notion

- A workspace tool that integrates databases, documents, and task management.
- Can be connected to real-time data sources for collaborative research.

## AirTable

- Combines the simplicity of spreadsheets with the power of databases.
- Allows real-time collaboration and data sharing among team members.

## Slack

- A communication platform that integrates with data tools like Google Sheets, Trello, and more.
- Enables real-time updates and discussions about research findings.

Thank You
